## Education

**University of California**, Santa Barbara, California

Expected Graduation – June 2022

Bachelor of Science Computer Science

GPA: 3.98

Regents Scholar (top 2.5% of school), College of Engineering Honors Student

Relevant coursework: Probability and Statistics, Artificial Intelligence, Machine Learning, Intro to Data Science, Intro to Deep Learning

**Palomar Community College**, San Marcos, California

September 2018 – June 2019

Relevant coursework: Multivariable Calculus and Differential Geometry, Linear Algebra

## Employment History

### Stealth

*Computer Vision Engineering Intern*

June 2021 – Current

- Working on something exciting and new!

### Allthenticate

*Lead Fullstack Engineer*

March 2020 – June 2021

- Led development on cloud platform in early stage startup, architecting scalable and flexible REST API from scratch.
- Taught advanced Vue JS by taking complete responsibility at each step of the development phase – delivered full web application while teaching and leading two other interns working on the same project.
- Built and deployed python backend with over 27000 lines to use Elastic Beanstalk, implementing dockerized development process to speed up iteration cycles by 25%.
- Gained experience with emerging web technologies such as JWT, ProtoBuf, and Nuxt.js

### Yaitea (self-employed)

*Business Owner*

August 2018 – September 2019

- Assessed a need for tutoring code and critical thinking to children, as programming skills arose in demand and traditional tutoring services struggled to keep up.
- Gained comprehensive experience with Google Cloud, Nginx, WordPress, and Frontend Web Dev through creating the tutoring business' website, at **yaitea.com**
- Collaborated with several students and parents to create lasting relationships
- Applied ability to learn rapidly and on the fly through the picking up and application of basic marketing to give sales pitches on the tutoring service
- Organized an extensive programming curriculum of 24 lessons
- Taught over 200 hours of coding and critical thinking to students

### Mathnasium

*Math Tutor*

June 2017 – September 2017

- Developed robust teamwork skills through daily collaboration with other tutors
- Leveraged detail-oriented personality to precisely record each student's progression through problems, homework sets, and curriculums
- Communicated clear and concise summaries for parents after each student's session
- Began to develop tutoring skills that would eventually evolve into Yaitea.

## Research Experience

**Biometric authentication with EEG brainwaves (Yi Ding, Professor Tobias Hollerer)**

March 2020 – Present

### *Experiment designer and analyst*

- Designed variant of leave one out validation for binary classification on authenticated user
- Created new data loader class with Pytorch to use with Yi's existing EEG CNN
- Wrote up results for publication, to submit to ICMI in May 2020.

### **UCSB Sexuality Research Project (Professor John Baldwin)**

October 2019 – Present

#### *Backend developer and Webmaster*

- Reduced load times by 80% by enabling server and client side caching, increasing monthly viewership by 30% from 40,000 to 53,000
- Lead developer for homepage, topics page, search bar, and FAQ page.

## Professional Skills

### Advanced

#### **Pytorch**

#### **Technical Communication** (Explaining Code)

Numpy/Pandas

Vue JS (Frontend Web Dev)

### Intermediate

#### **React JS**

Bash Scripting

Flutter

Keras
